Description

Wenn schnell hintereinander Produkte hinzugefügt werden werden mehrere E-Mails hintereinander geschickt da dann der Database-Service alle paar Sekunden einen Request an den Mailing-Service schickt. Das führt zu vielen E-Mails hintereinnander was für den Nutzer als unvorteilhaft gesehen werden kann. Außerdem könnten die E-Mails als Spam eingestuft werden.

Current Situation:

• Im schlimmsten Fall werden alle paar Sekunden Update E-Mails verschickt wenn schnell hintereinander Produkte hinzugefügt werden.

Future Situation:

• Maximal alle z.B. drei Minuten wird eine Update E-Mail rausgeschickt.

Description

Der Mailing-Service wurde aufgrund von Änderungen am gesamten Projekt refactored. Auf Grund Dessen ist die Dokumentation des Mailing-Service nicht mehr auf dem aktuellen Stand, weshalb die Dokumentation geupdated werden muss.

Folgende Punkte müssen in der Dokumentation auf notwendige Updates geprüft werden:

- Class-Diagram
- Sequence-Diagram
- Api Spec
- Markdown Description
- (Components-Diagram vom gesamten Projekt)

Current Situation;

• Verchiedene Teile der Dokumentation des Mailing-Service sind auf Grund verschiedener Refactorings nicht mehr auf dem aktuellen Stand.

Future Situation:

• Alle Teile der Dokumentation des Mailing- Service sind auf dem aktuellen Stand.

Description

Clean-Up:

Parent:

• Kommentare: Nur wenn diese notwendig sind!

WebSite/APP

- **Naming**: Python Kovention: snake_case variables, methods, files, packages, ...), PascalCase (classes)
- Clean-Code: Wende Clean-Code-Regeln an um die Code-Qualität zu verbessern.
- **Struktur**: Ist es möglich die Struktur durch die Anwendung von bspw. Design-Patterns zu verbessern?
- Formatierung:
- Methodenlänge (so das diese auf den Bildschirm passt)
- Klassenlänge (Klasse soll sich nur um eine Sache kümmern!)
- Zeilenlänge (so das diese auf den Bildschirm passt)

Ziel

Verbesserung der Lesbarkeit, Wartbarkeit, Erweiterbarkeit und der generellen Code-Qualität.

Issue links:	Polaris issue link		
	implements <u>SYSAD-57</u> Detection-Service -> Pircutres -> Dat Done		
Sprint:	Sprint 13, Sprint 10, Sprint 11, Sprint 12		
Story point estimate:	0		
Rank:	0 i00008:c		

Description

Der Database-Service soll eine Schnittstelle bekommen die von dem Detection-Service aufgerufen werden kann. Diese Schnittstelle soll es ermöglichen dem Database-Service alle Product-Klassen zu schicken die erkannt werden können. Der Database-Service soll die Klassen dann in der Datenbank speichern und verwalten.

Schnittstelle: /init_products (PUT)

Payload:

{ model_classes:[juice, apel, plum, ...], overall picture: String }

Die Position der Product-Klasse bestimmt auch die ID.

Beim erstellen neuer Products-Klassen in der Datenbank soll darauf geachtet werden das schon vorhandene Klassen nicht dupliziert werden. Alternativ können die alle vorhandenen Produkt-Klassen aus der Datenbank gelöscht werden und neu erstellt werden.

Mit diesem Ticket soll auch noch die Schnittstellenbezeichnungen angepasst werden.

zum Beispiel

```
updateApp \rightarrow update_app
```

Außerdem soll der Payload der verschickt wird, folgendermaßen abgeändert werden:

```
Payload
{
     "products": {
          "1": {"name": "product1", "total_amount": "0", "picture":
"product1_picture"},
          "2": {"name": "product2", "total_amount": "0", "picture":
"product2_picture"}
     },
     "overall_picture": "overall_picture"
}
```

Description

Einen HTTP Server mit einem ESP 32 welcher dann an den Detection-Service weitergeleitet werden kann.

Comments

Comment by Noah Preyer [04/Jan/25]

Wir hatten uns überleget das wir keinen RaspberryPi sondern einen ESP32 verwenden wollen. Nach etlichen versuchen ein brauchbares Bild zu erhalten haben wir uns entschieden ein doch einen RasspberryPi zu verwenden.

Description

Hier soll das Model welches wir von Samuel bekommen haben integriert werden.

Comments

Comment by Noah Preyer [04/Jan/25]

Wird nicht gemacht da die Ultralytics das immer als YOLOv5 Model erkennt auch wenn es ein Yolov9 Model ist.

Nach Rücksprache mit Samuel haben wir das hier probiert:

https://github.com/ultralytics/ultralytics/issues/13293

Hat aber auch nicht funktioniert.

Wir nutzen nun die Standart Yolov11 Model.

Description

Database-Service:

- Api-Update(Alle bilder base64 encoded und decoded)
 - o overAllPicutres
 - ein gesamtes Bild welches alle Klassen mit Boxen versehen hat.
 - o ClassPicture
 - für jede geupdatete Klasse ein Bild mit den Boxen.
 - Dict mit ID und picutre.
 - Bilder Format ist .webp
 - Unknown macro: { products}

Ziel:

- Detection-Service schickt Bilder als BAse64 String an Database-Service
- Database-Service speichert Base64 String
- App/Website bekommt Base64 String
- und kann diesen dann decoden und das Bild verwenden

Description

Dokumentation soll für das Projekt erarbeitet werden. Folgende Teile sollten in der Dokumentation des gesamten Projekt hinzugefügt werden:

- Jira Documentation (Allgemeine Doku und Ticket List)
- Components Diagram
- Sequence Diagram
- Präsentationen (Als PDF konvertiert hochgeladen im Repo)
- Projektmanagement Doku
- Readme.md (Email Ben Staehle was alles rein muss)
- wo Email eintragen an welche Mails verschickt werden sollen
- - erst projekt dan cam service starten
- - ip muss in docker compose von cam service eingetragen werden und camera video0 oder ...
- - ip und port müssen bei flutter app eingetragen werden
- ..
- Projektanforderungen

Current Situation:

• Es exestiert nur teilweise Dokumentation und meist unvollständig.

Future Situation:

• Es exestiert eine Dokumentation für das gesamte Projekt die mehr als ausreichend ist.

Description

Erstelle Unit-Tests und Integration-Tests um den Service testen zu können.

Folgende Fragen sind im Team noch zu klären:

- Welche Bibliothek für die Unit-Tests?
- Welche Bibliothek für die Integration-Tests?
- Wo sollen die Tests ausführbar sein? Nur lokal? Im Docker? In einer Gitlab-Pipeline?

Ziel

Es sind ausreichend Tests vorhanden um die grundlegenden Funktionalitäten des Services testen zu können.

Sprint:	Sprint 14
Story point estimate:	2
Rank:	0 i00009:r7x2

Description

Clean-Up:

- Kommentare: Nur wenn diese notwendig sind!
- Naming: Python Kovention: snake_case variables, methods, files, packages, ...), PascalCase (classes)
- Clean-Code: Wende Clean-Code-Regeln an um die Code-Qualität zu verbessern.
- **Struktur**: Ist es möglich die Struktur durch die Anwendung von bspw. Design-Patterns zu verbessern?
- Formatierung:
- Methodenlänge (so das diese auf den Bildschirm passt)
- Klassenlänge (Klasse soll sich nur um eine Sache kümmern!)
- Zeilenlänge (so das diese auf den Bildschirm passt)

Ziel

Verbesserung der Lesbarkeit, Wartbarkeit, Erweiterbarkeit und der generellen Code-Qualität.

Original estimate:	Not Specified		

Sprint:	Sprint 3, Sprint 4, Sprint 5, Sprint 6	
Story point estimate:	1	
Rank:	0 i00009:y	

Description

Der Detection-Service wird eine Liste von Produkten die im letzten Frame hinzugefügt worden an den Database-Service schicken. Da es besser ist dann auch gleich diese Liste an dem Mailing-Service mitzugeben muss der Mailing-Service angepasst werden.

Ziel:

Mailing-Service soweit angepasst das er lauffähig ist.

Sonstiges:

Database-Service schickt Liste folgendes json-Objekts:

```
/send update mail:
               "productId": 1,
               "productName": "Müsli",
               "productAmountAdded": 2,
"productAmountTotal": 5
          } ,
```

Wobei alle Werte außer "errorMessage" required sind an den Interfaces "/sendMailAdded" und "/sendMailDeleted. Der Wert von "errorMessage" ist nur required am Interface "/sendErrorMail". Falls kein Bild vorhenaden ist soll der Wert von "productPicture" ein leerer String sein. Die restlichen Werte müssen bei allen Interfaces vollständig und valide beim Mailing-Service ankommen.

Sprint:	Sprint 3, Sprint 4, Sprint 5	
Story point estimate:	1	
Rank:	0 i00001:4	

Description

Ich habe ein paar kleinigkeiten welche ich ändern und aufräumen möchte.

CleanUp:

- Zusammenfassen von Dateien in Unterordnern.
- einheitliche benennung.(Kein Mischung zwischen Kammel- und Kebab-Case)

Modifikations:

- erhöhen der Auflösung der Kamera.
- Umschreiben. Die Detection soll immer laufen und man soll sich dann drauf zu schalten.
- add und delete umschreiben: ich schicke ein Array mit den hinzugefügten ID'S.
- getNext wird zu clearAll()
- atrifacte vermeiden.

Description

Erstelle ein Docker-Compose-File in welchem alle Services gestartet werden, so das nur noch ein Docker-Compose-File gestartet werden muss.

Current Situation:

• Alle Services haben ihre eigenen Dockerfiles und Docker-Compose-Files, weshalb immer alle Services einzeln hochgefahren werden müssen.

Future Situation:

• Es gibt ein Docker-Compose-File mit welchem das gesamte Projekt gestartet werden kann.

□ SYSAD-42 Done init connection detect-> database

Comment by Marcel Eichelberger [15/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 overlapping docker compose file:

\(\subseteq \text{SYSAD-42}\) Done first fixes (add works)

Comment by Marcel Eichelberger [15/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 overlapping docker compose file:

\(\subseteq \text{SYSAD-42}\) Done first fixes (remove works)

Comment by Marcel Eichelberger [15/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_overlapping_docker_compose_file:

Merge branch 'dev' into 'SYSAD-42_overlapping_docker_compose_file'

Comment by Marcel Eichelberger [24/Dec/24]

<u>Marcel Eichelberger</u> mentioned this issue in <u>a commit</u> of <u>stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker</u> on branch <u>SYSAD-</u>42_overlapping_docker_compose_file:

Merge branch 'SYSAD-44-Update-Mailing-Service' into 'SYSAD-42_overlapping_docker_compose_file'

Comment by Marcel Eichelberger [28/Dec/24]

<u>Marcel Eichelberger</u> mentioned this issue in <u>a commit</u> of <u>stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker</u> on branch <u>SYSAD-42 overlapping docker compose file</u>:

Merge branch 'dev' into 'SYSAD-42_overlapping_docker_compose_file'

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-59 human detection:

\square SYSAD-42 Done update

Comment by Marcel Eichelberger [28/Dec/24]

<u>Noah Preyer</u> mentioned this issue in <u>a merge request</u> of <u>stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker</u> on branch <u>SYSAD-59_human_detection</u>:

\(\sum_{\text{SYSAD-42}}\) Done update

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_overlapping_docker_compose_file:

\(\sigma \) SYSAD-42 Done adjusted clear all

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_overlapping_docker_compose_file:

□ SYSAD-42 Done mr cleanup

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch dev:

Revert "Merge branch 'SYSAD-42_overlapping_docker_compose_file' into 'dev'"

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 new overlaping docker compose file:

Merge branch 'dev' into 'SYSAD-42_new_overlaping_docker_compose_file'

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 new overlaping docker compose file:

\(\sum_{\text{SYSAD-42}}\) Done add docker-compose.yml

Comment by Marcel Eichelberger [28/Dec/24]

<u>Noah Preyer</u> mentioned this issue in a <u>commit</u> of <u>stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker:</u>

\(\sum_{\text{SYSAD-42}}\) Done add docker-compose.yml

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 new overlaping docker compose file:

Merge branch 'SYSAD-59_human_detection' into 'SYSAD-42_new_overlaping_docker_compose_file'

Comment by Marcel Eichelberger [28/Dec/24]

<u>Marcel Eichelberger</u> mentioned this issue in <u>a commit</u> of <u>stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker</u> on branch <u>SYSAD-42_new_overlaping_docker_compose_file</u>:

SYSAD-42: Adjust Mailing-Service to Request-Call from Database-Service

Comment by Marcel Eichelberger [28/Dec/24]

<u>Noah Preyer</u> mentioned this issue in <u>a commit</u> of <u>stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker:</u>

\square SYSAD-42 Done fixing 1

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_new_overlaping_docker_compose_file:

\square SYSAD-42 Done fixing 2

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_new_overlaping_docker_compose_file:

\(\sum_{\text{SYSAD-42}}\) Done dirty implementation

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24 lachmuth preyer eichelberger walser Fridgetracker on branch SYSAD-42 new overlaping docker compose file:

\square SYSAD-42 Done dirty implementation

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a merge request of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch SYSAD-42_new_overlaping_docker_compose_file:

Resolve □ SYSAD-42 Done "New overlaping docker compose file"

Comment by Marcel Eichelberger [28/Dec/24]

Noah Preyer mentioned this issue in a commit of stud-iki / prj-sysadmin / ws24_lachmuth_preyer_eichelberger_walser_Fridgetracker on branch dev:

Merge branch 'SYSAD-42_new_overlaping_docker_compose_file' into 'dev'

Rank:	0 i00008:

Description

- Erstelle eine GET-Schnittstelle über welche die Daten der Datenbank geholt werden
- Die Flutter-App kann später über diese Schnittstelle die Daten der Datenbank sich holen und darstellen.

Ziel:

- Über eine GET-Schnittstelle des Datenbank-Service kann die Flutter-App die Daten der Datenbank sich holen.
- /updateApp
 - o Schickt der App ein folgendes Objekt

{ 1:

{"productId": int, "productName": str, "productPicture": Base64, "productAmount": int}

```
2:
{"productId": int, "productName": str, "productPicture": Base64, "productAmount": int}
, ....
}
```

Sonstiges:

- Naming der Schnittstellen: Camel-Case (Bsp: sendMail)
- Docker-Netzwerk: stockTrackerDockerNetwork (fall das nicht geht: stock_tracker_docker_network)
